

## Lenovo

### Lenovo – Case Study

#### Company Profile

Lenovo is an innovative, international technology company formed as a result of the acquisition by the Lenovo Group of the IBM Personal Computing Division. A global leader in the PC market they develop, manufacture and market cutting edge, high quality PC products. Lenovo is a global company with an enterprise sales organisation and employs more than 19,000 people worldwide.

#### Business Needs

Lenovo were looking for a turnkey solution to enable them to comply with the main health and safety regulations. They were aware that the Corporate Manslaughter legislation was coming into effect and decided to go through a competitive tender, to select a system that would enable them to comply with key regulatory requirements.

#### Solution

ICS Safety worked with Lenovo to deliver a complete safety training and management solution to support and meet their internal compliance processes issues. It was rolled out in a very short time frame and covered Fire Safety, Manual Handling, Occupational Road Risk and DSE, as well as having the ability to perform and manage their risk assessments.

#### Benefits

The solution enabled Lenovo to create a training roll-out plan in advance of the Corporate Manslaughter (Homicide) Act coming into effect on the 6<sup>th</sup> of April 2008. A full cost justification exercise was done, and the Learnsafe solution was deemed to save a six figure sum, when compared with manual compliance- their CFO remarked:

*"The Learnsafe solution represents the most effective form of compliance for Lenovo, due to its ease of deployment across our multiple sites, and due to its transparent pricing structure. The solution has been well received by our employees, and represents a key component of our compliance strategy, especially given the impact of the Corporate Manslaughter Legislation."*
