

"Fulfil your legal responsibilities to provide basic fire awareness training to all employees annually and reduce your exposure to Corporate Manslaughter."

Fire Safety Training

Fire Safety Training

The regulatory reform (2005) fire order requires that you provide all employees with fire awareness training with refresher training in most cases being done on an annual basis. Failure to do this could lead to fatalities, the voiding of your corporate insurance policy, and ultimately, action being instigated under the corporate manslaughter legislation.

Fire Awareness Training Made Easy

Learnsafe's Fire Safety e-learning module focuses on the key preventative aspects and has a complete focus on personal safety. It provides employees with an appreciation of the causes of fire, as well as preventative measures, evacuation drills and what to do in the event of a fire. It literally could save lives.

Automated Fire Safety Retraining

It is generally accepted that refresher training for employee fire awareness should be performed on a yearly basis. For organisations with a high number of employees, performing this and maintaining the training records and audit trail is a major task. Learnsafe automates the retraining process and solves this issue.

Management Reporting (LMS)

The reporting module allows you to manage all of your training from one central location and provides a picture of progress throughout your organisation. Automatic reminders and scheduled re-training functions mean that you can focus on pro-active safety management and let the system manage your training and assessments, across multiple sites.

The Learnsafe Fire Safety Module Will:

- ✔ Help you comply with the Regulatory (Fire) Reform Order requirement to provide employees with basic fire awareness training
- ✔ Instil a culture of Fire prevention through outlining the common causes of fires
- ✔ Educate employees in the evacuation process and provide them with key personal safety learning's in the event of a fire
- ✔ Maintain an online audit trail of employee training and testing
- ✔ Automate annual retraining for Fire Safety

Fire-Safe Module Detail:

Audience:

Fire kills more people every year than any other force of nature. This module is aimed at every single employee. It is a legal requirement that organisations carry out this training, under the (RR(FS)O) and Fire (Scotland) Act 2005.

Course Objectives:

- ✔ Know their safety duties under current legislation/law
- ✔ Understand the nature of fire and how it spreads
- ✔ Identify potential fire hazards and the common causes of fire
- ✔ Recognise the importance of effective fire risk assessment in order to help prevent fire
- ✔ Identify the requirements of an effective fire action plan

Course Content:

Overview

- ✔ Welcome to Fire-Safe
- ✔ Why fire safety is important
- ✔ The fire triangle
- ✔ The spread of fire
- ✔ National fire statistics
- ✔ Fire Prevention

Common Causes of fire

- ✔ Classes of fire
- ✔ Slowing the spread of fire
- ✔ The cost of fire

Fire emergencies

- ✔ What to do when a fire is detected
- ✔ Fire procedures
- ✔ Evacuation and escape plan

- ✔ Being trapped by fire
- ✔ When you or someone's clothes catch fire
- ✔ Dealing with burns

Dealing with fire

- ✔ Assessing a fire
- ✔ Fire extinguisher types
- ✔ Extinguisher operation
